Alaska Highway Construction Photographs  
Ca. 1943

1 Box

SCOPE AND CONTENTS

The Alaska Highway Construction Photographs consist of 86 images on postcard stock taken along the route of the Alaska Highway during construction of the highway.

While the bulk of the images are of the landscapes and scenery through which the highway was built, a significant number of the images show the equipment, stages of road construction and personnel involved in building the highway. Subjects include bridge construction, ferry operations, truck convoys, and various pieces of construction equipment. Most of the photographs are captioned and credited to "F.C.C."
